Nonresident Senior Fellow,
Atlantic Council GeoTech Center
Senior Fellow, Data Foundation
Center for Data Policy.

Governing AI in Health: Innovation, Data, and Trust Across Systems

What will you learn?

Who governs AI in health, at what level (national, regional, global), and according to which priorities

Which dimensions of governance should be privileged (legal, ethical, political, technical, social)

Importance of high-quality, high-volume data for AI
Unique considerations for health data

The transformative potential of AI in health, contingent on access to large-scale data

Thursday, April 30, 2026

13:00 - 14:00 EST
